Westinghouse Discusses His Affairs.

Pittsuac, Pa., March 12.—George Westinghouse, jr., arrived home from New York today to confer with his associates relative to the recent election of officers of the Union Switch and Signal Company. He was not prepared to say more than that the protection of the property and business of the company and the interests of the stockholders were to himself and associates ahead of any personal considerations. At this time nothing further could be said concerning the recent event in connection with that company. As to the electric company, he said his negotiations have progressed to his entire satisfaction and that only a little more patience was asked of those interested. It is thought that no logal steps will be taken to throw out the new board of the Union Switch and Signal Company.

With New York rendered peculiarly doubtful to the democracy by reason of factional differences, it would be particularly desirable that the nominee should be strong in Illinois, for that is a state the democrats might carry with the proper man and the right issues brought to the front. PALMER MAY BE NOMINATED.

This situation might develop and make Mr. Palmer's nomination probable, in spite of his age. He is seventy-three years old, but is vigorous, and the way he has held on in this fight for the senatorship shows that he has a cool head and fine staying qualities. He has an unusually good military record, is liked by the farmers, though he is solid on tinance, and his popularity in the state of Illinois has been strongly attested. Democrats say that he could certainly carry that state. The fact that he was acceptable enough to the Farmers' Alliance members of the legislature for them to vote for him indicates that he possesses a drawing power in a direction where the democrats generally think it is needed. If he should develop into a candidate for the presidency it would probably be with Cleveland's influence at his back and because Cleveland decides not to be a candidate. If Cleveland goes before the convention it is possible that Palmer may figure conspicuously at the tail of the ticket, as Mr.

Thurman did.

The defendant's affidavit states that he expects to prove by Morrison and De Arnaud the assaults of the deceased, Taulbee, on him about an hour before the shooting: by Mr. Durham threats made by Taulbee that he ought to kill and would kill affiant, which threats were communicated to him; and that Brown's testimony will be important, as a conflict will arise as to the position of the parties, as he saw deceased and Donaldson together when the occurrence took place and he did not see affiant loitering in the corridor nor greet him on the steps.

The application being in proper form and stating that their testimony is necessary for his defense, and that he is pecuniarily unable to pay the fees and no opposition being made, the court granted the motion.

Lusk of the water departm ted to the Commissioners for re for section 7 of the existing plumbing reg-tions: "No house, building, premises or est lishment shall be connected with any water m porary use of one of the public squares under its control for the erection of a post office. The square immediately in front of the Center Market was thought to be the best suited. Commissioner Douglass said he was not sure if such a thing would be expedient. He was in favor of doing all in his power to relieve the strain upon the local department, but thought before anything was finally decided upon the matter should be carefully considered.

It is the intention of Postmaster Sherwood to erect upon the square, if the same can be obtained, a large frame structure for the use of the department. Another site which is thought would answer all purposes is that occupied by the hay market.

The matter will be discussed at the next board meeting.
